📞 7456000100

This is a self-report inventory that assesses the student's traits, interests and suggests suitable occupations. This CAT is based on Typological Theory, which posits that most people can be loosely categorized into six types - Realistic, Investigative, Artistic, Social, Enterprising, and Conventional. It further states that occupations and work environments also can be classified by these categories. When people choose careers that match their own types, they are most likely to be both satisfied and successful. The purpose of this test is to help you identify your occupational personality, education options, and inform your decision making process.

Top Scores

Investigative: 24

Realistic: 18

Social: 15

PERSONALITY TRAITS ACCORDING TO YOUR SCORE

3 Point Code: IRS

As per your 3 point code, your dominant personality type is Investigative, followed by Realistic and Social. An individual who is of the Investigative type indicates an analytical orientation, wherein they enjoy drawing conclusions from systematic and objective observations. The adjacent Realistic type is most comfortable being involved in activities that are concrete and based on clearly defined systems and norms. Followed by Social type which demonstrates sensitivity to human needs, nuances of emotions, thinking patterns and other aspects of human behaviour.
